

Chapter 8 Review Questions - Rigorous notes are also acceptable.

As always - be sure you understand all of the bold and italic words.

1. Examine Figure 8.4 and figure 8.6. Using these figures as a basis, describe how non-living factors appear to effect what Biomes are where.
2. What two observations form the basis of the theory of island biogeography?
3. What is an ecological island and how does it relate to the concept of Island biogeography?
4. Make a large table (it will probably be several pages long) where you chart the features of the 17 major biomes. Things to include might be: Temperature, rainfall, seasonal patterns, soils, flora (plants), Fauna (animals), names/locations, other unique facts or features.
